

Labconco Visit To BNC on Wednesday, October 8, 2008 in BRK 2001, 10:00 AM

Adam Keithley, Marketing Manager and Bob Applequist, Product Manager will be on hand for short presentations on **glove boxes** and **hoods (specifically designed to handle nano particles work)**. They wish to learn as much as they can about **Nanotechnology**, our **equipment uses, applications, needs and concerns**. This is a great opportunity to interface with people within the lab industry for future requests and development concerning nano chemical equipment and devices.

Labconco Corporation, (first named Laboratory Construction Company), was founded in 1925 by Ralph Callaway and Phil Goldfisch. The company's first product was a Kjeldahl Nitrogen Determination Apparatus, which agricultural laboratories used to test the protein content of feeds and grains. From humble beginnings as a one-product shop in a small garage in downtown Kansas City, Labconco employs over 200 associates at facilities in two locations and manufactures 16 different product lines.

Labconco sells through a worldwide network of laboratory supply distributors. In 1996, Labconco received the prestigious President's "E" Award for excellence in exporting from the U.S. Department of Commerce. Many of our products carry CE Marking signifying electrical conformity for use in the European Community. GSA contracts are available to governmental agencies and other authorized entities.

We have 3 state-of-the-art facilities at our Kansas City location to help you get to know our products first hand. The tri-level Auditorium, which is equipped with fully operational products for demonstration and training purposes, seats up to 100 people. The Demonstration Lab is a real laboratory where tests and methods are developed using our equipment. The Airflow Test Laboratory allows testing of new fume hoods and biological safety cabinets.

Labconco is an ISO 9001 certified company that prides itself on the quality of our people and products. Labconco products adhere to high standards including ETL and NSF Standard 49. Labconco Corporation is pleased to announce it has received ISO 9001:2000 certification. The International Organization for Standardization (ISO) established ISO 9001:2000 as a family of standards that state generic requirements for instituting a company's quality management system.

Labconco Corporation (labconco@labconco.com)
